

Every college desires that their students get innumerable opportunities to work with MNCs, Startups, Research Institutes, Corporate Sectors, the Ministries, PSUs and other distinguished Government agencies. The Covid-19 crisis has further led to reverse migration of skilled workers in huge numbers and has created an acute skill shortage in India. Being a statutory body and a national-level council for technical education, under the Department of Higher Education, Ministry of Education, the All India Council for Technical Education (AICTE) has always strived to provide the best of its resources in helping the Indian MSME sector utilize the potentials of our Higher Education System.

AICTE facilitates the enhancement of the employability skills among students by collaborating with Government Stakeholders, Private companies, Startups and MSMEs. As the country faces a lockdown, students can benefit from various online/offline internship/training opportunities to develop their skills and enhance their learning. Currently portal has 38500 + Internship opportunities available for students across PAN India.

We at the Internship Cell of AICTE believe that in these calling times, the students from Indian universities and colleges can efficiently fill the skilled resource void that is created by reverse migration. And hence, it gives us immense pleasure to invite you along with your students to start their internship experience via the state-of-the-art internship portal developed by AICTE .

Planned Internships available on the Platform (2020 - 2025) :

Organization	No. of internships provided
--------------	-----------------------------

Government Internships	
------------------------	--

	35 Lakh by 2025
--	-----------------

MSME Internships	
------------------	--

	40 lakh by 2025
--	-----------------

Startup Internship	
--------------------	--

	10 lakh by 2025
--	-----------------

MNCs, Research, NGOs Internships	
----------------------------------	--

	15 lakh by 2025
--	-----------------

The portal envisions creating synergies between advancing functional skills in students and harnessing their energy and ideas to co-create innovative solutions. Some of the key benefits this portal can offer to the Institute and its students are:

1. We have introduced several innovative and unique features like filter by skills, location-based internship opportunities and instant-online certificate generation, which will significantly ease the process of finding Government certified, legitimate and authentic internships opportunities for your students.

2. Student interns can acquire the skill-sets required in various industries with the help of training and internship programs which will provide them an upper edge in placement. Our portal will be a great value addition for colleges who have a final year semester entirely dedicated to the internship, and all those engineering colleges where internship and industrial exposure is mandatory.

3. Students rely on various online platforms to look for internship opportunities and sometimes end up falling prey to ingenuine and fraudulent internship offers. To counter such unethical practices, AICTE has taken the lead to provide a secure and trustworthy platform for both students and companies for the sole purpose of internships. To validate the authenticity of the internship postings, employers are required to mention their GSTIN or TIN number while registering on the portal.

4. The industrial internship and training that a student undergoes during his higher education has a long-lasting impact on his/her career. They are an excellent way for him/her to apply the knowledge from the classroom to real-world experience. Hence, by deploying young individuals as interns, your company will be contributing to the creation of a future-ready workforce required to realize the “Atmanirbhar Bharat” as envisaged by our Prime Minister Shri. Narendra Modi.

We will be happy to interact with you in case you wish to know more about AICTE’s NEAT Cell and its initiatives.
