Important for Participants

Do's or Do-not's

- First you need to register on the Google Form, with the link provided.
- There is no specific need for any kind of preparations but we do suggest that you try to hone your cyber skills and practice innovative ideas.
- You will be given a prompt with a date a file on the day of the event once the start of Hackathon is announced. Sprint time 24 hours. Your fooding and welfare shall be taken care.
- prompt data shall be in excel sheet. Data would relate to health and treatment; you may ask MBAHA students or any life-science students in team(it's choice)
- You will work in team. Team size- 3(min) & 5 (max)

No GITHUB or plagiarism
We would check

- Total number groups that can contest- Maximum 10 groups; minimum 3
You would be given desktops, but you may bring in laptops. The final solution would be assessed from event desktop, only.
- What is expected- **solution to prompt**-like, what message does this data give you; how would you develop a program/model for future.
- You will make 5 minute presentation explaining innovation of your idea. PPT / video stand-up presentation is expected
- Decision of Judges shall be final

Our team will be in touch with registered students
